Attention: Magda Van Der Merwe

RE: Reference Letter

Kayreed board and Timber offer a variety of engineered wood products. We are proud of the value and standards of our products.

In line with the offering of quality products to our customers; we also took a decision to upskill and develop our employees by partnering with Triple E Training.

The business partnership was established in 2021 offering Adult Education and Training (AET) to Kayreed employees, where classes are held twice a week on Tuesdays and Thursdays.

Triple E Training has delivered excellent service to our business and we are gratified with everything they have done for Kayreed employees.

Training has been well received by employees themselves and boosted moral within the organisation.

Without hesitation I would recommend Triple E Training for any business that wants the best for their employees when it comes to training and development.

Yours in business

LAWRENCE MUFHANDU
HR MANAGER
